## Town Council Has Very Quiet Session

Set New Rate For The Drinking License

Last Monday's session of the Town Council was a very quiet one. Very little business of importance was transacted.

Those present were Mayor Worts and councillors Newnham, Hargrave, Shaw and Brown.

Mr. Leonard Hicks was present and asked for permission to move the metal sign frame from corner of Broadway and Second St. to lot opposite Premier Brick plant. His request was granted.

The monthly accounts passed by the finance committee were approved for payment.

Monday, May 29th was set for council to sit as a court of Revision.

As the old Palace Rooming house building, north of the town hall on Fourth St., was reported in a dangerous condition it was decided to have it torn down and the lumber offered for sale.

The question of dray licenses was up for discussion and it was finally decided that the license fee be \$10 per year for first team and a fee of \$5.00 for each additional team. For single horse the fee was set at \$3.00.

Mr. E. Stone, on behalf of the Swimming Pool Association, requested that the Town have the fence around the pool repaired. The request was granted on condition that the Association supply the necessary posts.

Council then adjourned.

## Barbara Stanwyck As Girl Bandit

Barbara Stanwyck, in a new type roll with a new leading man As a dashing and attractive bank bandit, cool, worldly wise and hard boiled, who matches her wits against police, Miss Stanwyck enters a roll far removed from her recent characterizations. For the first time in her life also she appears as a platinum blonde. Preston S. Foster, who played a crook part in "I'm a Fugitive from a Chain Gang," plays opposite Barbara Stanwyck. The story is a revelation of the life of women prisoners in the California prisons and is based upon actual prison experiences of Dorothy MacKaye, the actress and the co-author of the play.

Billy Selhoun, who has been attending University in Edmonton, arrived home on Tuesday last to spend the summer with his mother and sisters.

## Prospects Promising On Local Farms

Seeding Late But Moisture Is Plentiful

Wet weather last week-end and the beginning of this week has again delayed seeding operations in this district. Between showers, however considerable work was done and it is now estimated that between 50 and 60 per cent of the grain is now in the ground.

There is an abundance of moisture to give the grain a good start and pasture lands are in excellent condition.

On the whole present prospects are very promising, but warm dry weather is now needed.

Mrs. E. H. Silhoun was a visitor at Calgary last week where she attended the convention of the Women's Missionary Society as a delegate from the Medicine Hat Presbyterial.

Mr. and Mrs. Tembath and Velma motored to Rossland last week. They returned Tuesday accompanied by Mrs. Tembath's sister, Mrs. John Melville, and small son Jack.

## STAMPEDE MEETING

A general meeting of the Stampede Association will be held in the reading room of the local Legion Club, on Monday evening next at 8 o'clock. As important matters in connection with this year's program will be up for discussion a full attendance is desired.

## Churches

GORDON MEMORIAL UNITED CHURCH

Pastor: Rev. R. Erskine Pow  
Sunday, May 14  
10 a. m. Church School  
11:15 a. m. Morning Worship  
Special Mothers' Day Service  
Theme: "Happy Homes"

8 p. m. Bowl  
7:30 p. m. Evening Worship.  
Subject: "Jesus Our True Environment."

"The hope of immortality is the best of all hopes."

ST. MARY'S CHURCH  
Celebration of Mass every Sunday of each month except first Sunday, at 8:30 a. m.

ST. AMBROSE CHURCH  
Rev. Malcolm Stewart, Vicar  
9 a. m. Holy Communion.  
10 a. m. Sunday School.  
1st and 3rd Sundays  
11 a. m. Choral Eucharist.  
2nd, 4th and 5th Sundays  
11 a. m. Mattins and Sermon.  
7:30 p. m. Evensong and sermon.

## REDCLIFF PUPILS MAKE GOOD SHOWING AT SCHOOL FESTIVAL

Win Three First and Two Second Prizes---Only School in Festival to Win Two Cups.

Redcliff School did exceptionally well at the School Music and dramatic festival held in Medicine Hat last Friday. In the events in which they entered the pupils from here won three first prizes and two second prizes, and Redcliff was the only school in the contest to carry away two of the cups. We are reliably informed that the combined marks obtained by Redcliff in the different events was also the highest of all the schools and that the percentage of wins in comparison with the number of entries was at the top. Almost all the entrants from Redcliff who were not winners of first or second prizes received honorable mention and many were within one point of the winners.

The two cups to come to Redcliff were the S. E. A. E. A. trophy for chorus singing and the Bulwark trophy for dramatization in grade seven. The other first prize was the Knights of Columbus medal won by Little Knudsen.

The two second prizes were for dramatization in grades 2, 3, 4 and 6 and for solo singing in grades 5 and 6. Those in the former contest were May Martin, Doreen Cook and Joan Walton. And the winner of the latter was Joan Balmer.

Miss Olive Fisher of Calgary Normal School, adjudicator for dramatization, in awarding the Bulwark Trophy to Redcliff: Grade Seven for their presentation of "Ben Hur" gave them 92 points the highest award of the day. She said the Redcliff group gave a very artistic performance. Their actions were very graceful and they had carried a difficult act to perfection all through.

Ted Harris, as Ben Hur won the hearts of the audience from the beginning and held them throughout the entire performance. Helen Hope as his sister Tirza was charming. Janet McFadden as the mother played the part wonderfully well. In the closing tragic scene these two girls showed exceptional ability. To keep so that the audience weeps also, requires more than ordinary skill. Ernest Bohnet as the Massala was splendidly brutal and arrogant, and the officer, Sid Pearson, and the two soldiers, Sanford Kaldstad and John Garrecht, acted their parts to perfection.

When one considers too, that the sketch was written by our principal Mr. King, and the brilliant and artistic costumes were designed by Miss Broadfoot and these two teachers, in conjunction trained the cast, the citizens of Redcliff have every reason to be proud of both teachers and pupils.

Mr. Rhyddit Williams, adjudicator of music, especially praised the fine work and training evidenced in the chorus conducted and trained, by Miss McWaine, which won the S. E. A. E. A. trophy. The mark obtained was 161 points, only one other chorus in the whole festival exceeding this splendid score and that one led by Mr. Bullen, music instructor of Medicine Hat Schools. The Redcliff chorus sang with sweetness and precision as one voice. The shading in expression was delightful. Both pupils and instructors have brought honor to their school and town.

## Redcliff Reminiscences

Taken From Our Files of May 8, 1914

The Pressed Brick Co. is running at full capacity to keep up with the orders at present in hand. Ten carloads of its best product were shipped out last week.

Messrs. Campeau and Livingstone are making alterations in the building on Broadway previously occupied by Reid and Carey, where they will carry on an up to date meat market. Mr. Campeau is a butcher of twenty five years experience in Eastern Canada and U. S. A.

A committee representing the different industries in town has decided to open show rooms for the display of Redcliff products in Calgary and Edmonton.

Rev. Mr. Gibson broke all records in church building last week by erecting a handsome chapel on the rear of the church lot, which will be used for church services until the church edifice is completed.

Armstrong and Lynch, local plumbers have secured a \$40,000 contract for installing the mains in the town of Bonaville.

Mr. T. A. Hicks has purchased a three-quarter interest in the Farmers' Meat Market in Calgary.

An addition to the Northern Hotel will be started next week. When completed it will be the third up to date hotel in Redcliff.

The Entre Nous Club held its last dance of the season on Friday evening. Among the ladies present, who were beautifully gowned for the occasion were, Mesdames, Corson, Brown, Burt, Evans, Porter, Towell, Deasley, Hicks, Patterson, Corson, Hodge, Redding, Fryberger, Sherwin, Wheeler, and the Misses McKellar, Timmons, Woodcock, Hargrave, McGregor, Clure, Enderby, Trimble, Fairbairn, Atcheson, Gibson, Pedersen, Black, Levers, Irvine, McKay, Hermis, Broadfoot, Adair, Robertson, Lusker and Quinlan.

Florence Bailey and Cyril Woods competed for the Ogilvie medal. All the entries from Redcliff were good. There is no doubt that both pupils and teachers have brought great credit to their school and home town.

LOOK AT YOUR LABEL

## Splendid Double Bill At New Dreamland

Thursday, Friday and Saturday "Downstairs"

"Downstairs," which introduces John Gilbert to his screen fans in a startling new departure as a sinister but colorful villain, is the attraction playing at the New Dreamland. Thursday, Friday and Saturday. "Downstairs" is a tense drama, laid in the servant's quarters of a European castle with Gilbert as a chauffeur, spreading a web of intrigue that enmeshes the entire household until a fantastic revenge ends his plotting. Virginia Bruce plays the heroine as the maid, and Paul Lukas enacts the avenging butler who lures the philandering chauffeur to a horrible doom. The cast also includes Hedda Hooper, Reginald Owen, Diga Bono, Edna Hoffman and others.

"Firefighters of Destiny" Tom Keene, the popular R. K. O. Path western star, who made a hit with the local fans recently in "Beyond the Rockies," will be seen in his latest attraction, "Fighters of Destiny," at the Dreamland. This action of the thriller unfolds in the high Sierras and they provide a background unsurpassed for the scenic beauty. The picture has been beautifully photographed with full advantage being taken of nature's grandeur.

A romance of the wagon trains which carried supplies to the towns of the pioneer west, "Fighters of Destiny" packs plenty of action and plot interest. There is love, interest, suspense and a lot of humor.

SWIMMING POOL MEETING  
A general meeting of the local Swimming Pool Association will be held in the reading room of the Legion Club, on Tuesday evening of next week at 8 o'clock. All interested in the carrying on of the pool are requested to be present.

## JUST FOR FUN

A T (h) race of a Face

There was an old woman of Thrace,  
Whose nose spread all over her face,  
She had very few kisses:  
The reason for this is  
There wasn't a suitable place.

Miss Jean McGregor, of Medicine Hat, who has just returned from a short visit to the coast, spent Tuesday in town the guest of Mrs. R. C. Hargrave.

## GOING OVERSEAS?

## Will Shoulder Burden

Canadians Paying Heavy Taxes But Will Not Tolerate Extravagance

Jack Knack for years has maintained at the equanimity of John Bull in crises, and particularly his sang-froid in accepting heavy national taxes. The old gentleman has invariably shrugged his shoulders, smiled, tightened his belt and turned to the work in hand, tackling the most immediate problem with a calm chance that was amazing to others.

Now Jack Knack is getting a tax, a tax very of what to do. John Bull has become common. In other words Canadians have come to realize that those who are earning and spending must be prepared to pay more into the coffers of the country to improve its financial position.

The Rhodes budget is heavy. It hurts. But when one is hurt he is apt to take a deeper interest in the reason for that condition. Hence Canadians will in the future scan governmental expenditures with a keener eye. They are willing to pay, willing to take their obligations, will shoulder tax burdens like John Bull for the national good, but they will not tolerate extravagance or politicians pulling wires where public funds are directly or indirectly involved. —Kitchener Correspondent.

## Cattle Shipments Active

Fair Demand in Britain For Cattle

There's a fair quantity these days of what may be regarded as the "roast beef of Old England" being shipped to the British people in their own country but which a short time before was prime young steer in Canada. The shipments of live cattle from the Dominion to Great Britain are particularly active this year. From January 1 to March 23, 1933, a total of 7,311 cattle were exported from Canada to British ports, an increase of 7,454 compared with the corresponding period in 1932. With the opening of navigation on the St. Lawrence it is expected there will be heavy shipments from Montreal to all Great Britain ports, and received from buyers in Britain.

## Opinion Of Dr. E. H. Eklund

Eklund Thinks Break Has Come Of Akron Disaster

Dr. H. Eklund, dirigible expert, floundered the theory that a storm had caused the Akron tragedy, and said in his opinion, from reading the report of the inquiry, the crash was caused by a break of the big ship in the airplane carrier room. Dr. Eklund said he always had suspected the room, in which the "planes" were stored, was a weak point in the Akron's framework. His comments following the Akron disaster tracing the Akron disaster to broken ribs in the huge dirigible.

## Unbreakable Milk Bottle

Has Been Developed In Pittsburgh From Wax-Like Material

Aluminum milk bottles have been developed in Pittsburgh. The bottle is first molded in one piece from cellulose in the shape of the standard flat, pint, and quart glass containers. It is then impregnated through its entire wall thickness with a research chemical, "wax," a tasteless and odorless wax-like material. The bottle will not soften under constant exposure to water or lactic acid, it is said, and will pass through present types of filling and capping machines.

## Secret Uncovered

Dr. Ferruccio Zeller, of Trieste, Italy, claims that the depression process used by early violins makers who were able to produce the deadening and sweetening effect of stringed instruments. He says that a resin oozed from plants that grow only in Persia furnished the base of the secret mixture used by Italy's classic violin makers.

## Scrap Is Circulating

Raymond Alberta, official declare the town's scrap issue apparently found favour outside the town as one warrant was returned for redemption bearing the stamp of five Calgary banks.

Chateaus, almshouses, fisheries, villas, peaches and other varieties of nuts have been successfully grown in the Okanagan Valley, British Columbia.

## PATENTS

A Life of "Wanted Invention" and "The Ramsay Car" by Dr. Ramsay. The Ramsay Car is a new type of car, built on a new principle, and is a great improvement on the old type.

W. N. U. 1933

## Billious?

Don't delay! Relieve congested bowels of biliousness. Take Eno's and every morning.

TAKE ENO'S FRUIT SALT

## Delayed Taking Out Patent

Inventor Of Moving Picture Camera

Lost Millions and Died Penitence. A recent report from the Burroughs office showed that Jean A. Le Roy, inventor of the motion picture projection machine, died penitence. The millions of dollars that he rightfully did not legally his, went to others because he neglected to patent his invention soon enough.

An incident feature is that Le Roy's last few years were spent in poverty. Paralyzed, he subsisted largely on the bounty of friends. All he had at his death was reputation but that doesn't pay doctors or food bills. And that slender sustenance came to him only late in life.

For many years, the origin of the motion picture camera remained shrouded in mystery, many famous claimants. An impartial investigation finally allotted the honor of being the father of the motion picture industry to Le Roy. But it was not until two and one-half years after he had perfected the first projection machine that Le Roy was able to get his first public exhibition of moving pictures in 1894. His statement on why he never patented his machine, perhaps, better than ever before, how many inventors live to see others reap the enormous profits of their genius. Said Le Roy: "I didn't patent my invention because I didn't realize what I had. I thought the new machine was an unfortunate for me that my knowledge of patents and patent law was exceedingly meager. Like the average inventor, I centered my efforts on the invention itself, to the absolute exclusion of everything else."—From 21st New York.

## Wheat Stocks Increase

International Institute Of Agriculture

At Home Forecasts Increase

The International Institute of Agriculture predicts in its semi-annual survey that wheat stocks are expected to be "further and very appreciable increase" during the present season. On August 1, 1932, exportable stocks were 585,000,000 bushels. The institute is forecasting that they will have risen to 650,000,000 by August 1 of this year.

"The burden of these stocks may be readily grasped from the fact that their total appreciably exceeds world import requirements for the whole season," the survey states.

"It can only be hoped that in a short time the general world economic situation will improve and international commerce recover its normal course so that the very heavy burden of wheat stocks so expected by the world wheat market may be reduced to normal dimensions."

## Mystifying Magic

New York Audubon News Strange Story Of Bird Caught In A Net.

An audience in a New York theatre applauded the other night as a woman "burned to death" before their eyes. They asked questions of a plate of skull and marched forward to have their pockets picked. One man even smiled as his new derby hat was used as a mixing bowl for pancake batter.

These strange events took place during the annual benefit show of the Society of American Magicians. The audience relished Joe Kato's derby hat trick and groaned delightfully as the borrowed derby was filled with batter, which changed mysteriously into six hot pancakes, leaving the derby steaming hot underneath.

A wood-burning automobile bus in operation in Germany is claimed by the inventor to offer a 50 per cent saving in fuel cost.

## Large Landward Movement

Many Families Have Been Placed On The Land, Through Colonization Work

Between October 1, 1930, and January 31, 1933, the Canadian Government Department of Immigration and Colonization, the Canadian National Railways, and the Canadian Pacific Railway, working together, have been instrumental in placing upon farms in Canada a total of 10,735 families. These families already resident in Canada. On the basis of five to the family this means 53,605 persons. This family settlement was confined to those who had sufficient capital to establish themselves on the land.

In the same period 23,335 single men were placed in farm employment. Adding these to the families, the impressive total of 78,918 persons are actually placed on the land is reached.

Simultaneously with this movement had settlement activities were being carried on by the Provincial Governments. In one year—1931—the Government of the Province of Quebec placed 6,944 families in farm settlement, and in the three years 1930, 1931, and 1932, the Government of Alberta granted 89,223 homesteads to residents of that province. Similar activities were carried on by other provinces. In addition, there was a large landward movement entirely on the initiative of the individual settlers themselves.

## U.S. Taxes Heavy Too

Comparative Figures Given By San Francisco Paper Are Startling

Money for 1932 could employ, at the \$10-a-week rate paid by retail agencies, no fewer than 17,948,711 men for a whole year.

The combined annual cost of our Army, Navy and Air Force equals less than three weeks' tax impositions for 1932.

The tax burden averages \$500 for each family in the land.

If all the paper currency in circulation throughout the country were added to the gold, we would still owe the tax collectors as much more again—tax more.

This year's taxes could pay off every farm mortgage in the land, with enough left over to donate \$600,000,000 to the care of six million farmers.

The total salaries and wages being paid this year by two hundred thousand manufacturing establishments to some eight million executives and employees will not match the Nation's tax claims.

Thirty-six Panama Canals could be built with one year's tax receipts. —The Argonaut, San Francisco.

## Holding "Enjoyment Week"

Lord Mayor Of London Sponsors Seven Day Festival

Under the auspices of the Lord Mayor, London is holding an "Enjoyment Week," starting May 27 and concluding like the proposed execution in Gilbert's "Mikado," with "general rejoicings" and a grand display of fireworks" on June 3, the King's birthday.

"A week of festival," says the Lord Mayor, "undoubtedly has the effect of getting the people to take the brighter view of the situation. The situation is by no means as bad as is supposed in some quarters, either," said his lordship.

Hardly secondary to this aspiration though is the desire to further popular London as a tourist centre. It is hoped the program will include a pageant procession and a gala demonstration.

## Record Of Flying Squad

Arrests Made by Flying Squad Of Scotland Yard Last Year Numbered 600; In 450 cases the prisoners were violent, and 150 of them carried firearms.

The Flying Squad is less than forty.

India-China sent more than 1,300,000 tons of rice to other countries last year; in 1931 it exported less than 1,000,000 tons.

One thing about sunsets is that small towns have just as big ones as the large cities, and a dangled lot easier to see.

Mr. Firstingham, British Consul, writes: "I was bothered with palpitation of the heart, and my nerves were all I could do and sleep."

I was getting desperate and confided my trouble to a friend who recommended me to use Dr. Williams' Pink Pills. I purchased a box and got such relief I would gladly recommend them to all who are troubled as I was.

For sale at all drug and grocery stores; put up only by The Dr. Williams Co. Inc., Worcester, Mass.

## The Bowl Truth

Ogden's Cut Plug will stand up under any cross-examination! It's ready to give you the "inside facts," the honest truth, about its finer flavour, richer fragrance and cooler smoking quality. No alibis for Ogden's. Is got the proof and its story never varies.

That's why men like Ogden's Cut Plug. You see Ogden's is just made for pipes, made to pack right, to light right... to smoke right. And your pipe will prove it!

## OGDEN'S CUT PLUG

If you "roll your own," use Ogden's fine cut cigarette tobacco and Chevalier cigarette papers

## Police Discarding Horses

Automobiles and Other Conveyances Replacing Horse Of Scarlet Riders

The famous Royal Canadian Mounted Police have become mechanized and modernized to a large extent within the past few years. The horse, so closely associated with the scarlet coated force, is being replaced by machine.

With the added duties of customs preventive work and the fact that six provinces have scrapped their former police departments in favour of protection by the R.C.M.P., this force now has 2,500 officers and men. Their equipment is made up of 450 automobiles, 27 motorcycles, 13 trucks, 101 boats, both seagoing and for use in inland waters, 448 dogs, and only 26 horses. The dogs are still much in demand for work in the far northern sections of Canada although seropines are rapidly coming into use to make in a few hours journeys that take days and weeks.

## Reindeer Lakes

The boundary between Manitoba and Saskatchewan passes through Reindeer Lake, the largest part being in the latter province. This lake is about 140 miles long, 10 miles wide of about 35 miles. Its greatest depth is approximately 80 feet and its water is very clear. It is dotted with many islands, practically all of which are covered with green timber. The shores are mostly rocky and steep, but some sandy beaches occur. The southern end of the lake is shown on the Reindeer Lake South map recently issued by the Topographical Survey, Department of the Interior.

## Palpitation Of The Heart

Nerves Bad - Could Not Sleep

Mr. Firstingham, British Consul, writes: "I was bothered with palpitation of the heart, and my nerves were all I could do and sleep."

I was getting desperate and confided my trouble to a friend who recommended me to use Dr. Williams' Pink Pills. I purchased a box and got such relief I would gladly recommend them to all who are troubled as I was.

For sale at all drug and grocery stores; put up only by The Dr. Williams Co. Inc., Worcester, Mass.

### THE SCHOOL FESTIVAL

Those who attended the School Music and Dramatic Festival, held in Medicine Hat last Friday, were very much impressed with the excellent work being done by the school teachers in this inspection.

Results of examinations in the past have shown that these teachers have produced good results in their academic work, and the demonstration given at the festival last Friday, shows beyond doubt their capabilities for the development of our young, in the musical and dramatic arts, both of which are very important branches in the training for good citizenship.

Such training was never more necessary and welcome than now when all sorts of canned and artificial entertainment have crowded out of the lives of our young people, the tendency and the desire to develop their own talents and become entertainers themselves.

As Mr. Rhyddel Williams, the Adjudicator, said: "Childhood is the seedling time for implanting the love of music and dramatic expression and for the joy in swing and rhythm which children always learn so easily." And as Mr. Marsh said on good authority: "Music and dramatization are a method of self-expression for the child, and that is one of the most important factors in their training and one that is to the mind what exercise is to the body."

So far as Redcliff's part in the Festival is concerned our citizens have just reason to be proud of the excellent showing made by the pupils from this school. This also reflects great credit on the ability and interest of our teaching staff.

A few weeks ago Joseph Guest, of Calgary, laid a charge

against F. J. White, M.L.A., alleging that Mr. White entered into printing contracts with agents of the provincial government while he was a member of the legislature, and he (Guest) sought a \$200 a day penalty from Mr. White.

Now after trying to prove his point Mr. Guest comes out flat footed and admits that the fact the action was brought on baseless rumors which he investigated and found to be absolutely without foundation. Just another case of Mrs. Gresh told Mrs. Gray, that she heard the butcher boy tell the baker boy that the ice man said E.H. Jones told him—and so on. Such stuff always did and always will cause no end of grief for those who listen to it.

### THE MODERN WAY

"I'll try a pound of this," said your grandmother, "if you are sure it's fresh."

That was some time in the second hour of her morning's search for groceries. She went from one open barrel or open box to the next, along an unappetizing row of crackers, teas, cereals, dried fruits, lard and sugar—all in bulk. She shook the flies away, looked at, touched and tasted each article suspiciously, and finally decided to buy or not to buy, as her judgment directed. She could not trust a servant to do it. It was a days work in itself.

Today, in two minutes, you give the grocer your order. You know that everything you get will be fresh, pure, attract-

## If Mars Were Nearer To Earth

Many Details About Planet Would Be Made Clear

Mars has a diameter of 4,215 miles, as compared with 7,926 for the moon, so that if he were as near up as is the moon, we should have a many-tinted sphere about twice the size of our moon. We should see this sphere of Mars with the broad expanse of orange tint which gives the star its reddish hue. There would also be greenish and blue-grey areas with outlines of a curious geographical appearance; and bays, retreating gulches, isthmuses, suggesting a world similar to our own.

The similarity would be accentuated by a large bright area encircling the North Pole of Mars, which will shrink from about 3,000 to 200 miles in diameter. This polar area, which is now turned toward us, is the most brilliant part of his lovely orb, and is apparently the planet's snow and ice-covered area. It would be seen gradually to diminish in size in the course of the Martian spring and summer; and at times large portions might be seen to break away and float southward, or, if on high plateaus, become detached and take longer to melt. All this has already been observed in such powerful telescopes at various times. Meanwhile some of the low lying areas and seas would appear to have grown more extensive, apparently by the inundations produced by the melting snows. These obvious inundations have been seen to take place in the equator, with the result that the greenish areas increased considerably with the coming of the Martian summer.

All these details would be obvious were Mars as near as the Moon (but over 200 miles away) at the present distance. Probably some of the more distinct of the greyish streaks would be seen, stretching in a remarkable manner from various bays, estuaries and certain well-defined points on the coasts across the extensive reddish areas.

These would appear to be desert regions, and the greyish streaks cross them apparently in straight lines, as a rule, though there are some irregular, known curved streaks. They would be seen to grow in length with the advance of the Martian seasons, link up with one another, and unite in greyish spots and patches—ones, they are called. Some would vanish, others reappear after long intervals.

These are the so-called "canals," of which over 400 have been counted. In width, varying from 20 to 100 miles, and extended in some cases for over a thousand miles, these so-called canals are regarded by astronomers who have studied them, and know most about Mars, to be cultivated areas of vegetation irrigated by the waters collected in narrow channels which occasionally extend to the sea. Gathered here and there are rows of dots, suggesting patches of vegetation following lines of water. The greenish areas have been seen in places to turn brown as the Martian autumn advances.

Occasionally we should see a whitish film gather and cover up parts of this beautiful spectacle. These are the mists and clouds which generally surround Mars, for it is obviously a world in which water is not plentiful. An added interest for us would be to see this fascinating world, as it hung above us, gradually turn round on its axis in the course of 24 hours 37 minutes, and bring the whole of its mysteries into view.

## Now You Tell One

Amateur Pentathlon Of Montreal Has Some Queer Items

Heavens to Jack Charlton, of Montreal, amateur poultry champion of Ontario, who has a one-legged hen which laid a double egg, and in turn produced one dead natural chicken and one live three-legged bird.

"The double egg was not the common two yolk kind," Mr. Charlton pointed out. "It was the rare two shell type, one brown and one white—joined together from the outside."

Mr. Charlton, a modest man without pretensions to greatness for his chicken's feat, has, in addition, a chicken which eats with equal delight cigarette butts, broken eggs or waffles, and which can stand on one leg and whistle.

"This bird's diet includes candy cane," Mr. Charlton explains, "and he but all of Mr. Charlton's birds take to beer 'with gusto,' he said."

"Uncle, you're not married are you?"

"No darling."

"Then who tells you what you ought not to do?"

W. N. U. 1931

## THE LAUNCHING OF THE SECOND POCKET BATTLESHIP

Our picture shows the launching of the second German pocket battleship, "Admiral Scheer," before a vast crowd of spectators at Wilhelmshaven. Note the Nazi salute being given as the new vessel slides down the slipway.

## Something Wrong With Systems

At On Milk Distribution Shows Big Spread Between Producer and Consumer

From evidence submitted by the head of a milk distributing firm to the parliamentary committee on investigating milk prices throughout the Dominion, the Farmer's Union ascertains that the ten-cent piece which the urban consumer sometimes pays for his quart of milk is divided as follows, using data for February last:

	Cents per quart
Farming cost	2.15
Handling charges at depot	.46
Transportation to city	.52
Production costs, including pasteurization	1.19
Selling and delivery	6.12
Containers (bottles)	.19
Insurance tax	.09
Net profit	.68
Unaccounted for	.12
Average selling price	9.63

This looks like rather poor business from the standpoint of the dairy farmer. Certainly there must be something wrong with the system of distribution when the costs attending the selling and delivery of milk alone are nearly double what the farmer gets for the raw product. As the Bureau points out, the gross spread between what the farmer receives at the farm and the average selling price is over three and a half times what the farmer gets to cover the whole of his production costs—Brookville Recorder and Times.

## Laughs At Army Doctors

Nomadic Service Was Refused For Service In Civil War

A remarkable man turned down by doctors as "unfit" for service in the civil war, was celebrated by his 90th birthday by taking his 14th 12-mile walk. The physician who turned him down in '61 said he couldn't stand the march.

Since the civil war, Seth W. Lincoln, of Worcester, Mass., has outmarched the armies of Lee and Grant, the Spanish-American war and the World War.

Every day when the weather is fine, Lincoln takes a walk from his home to the doorstep of some friend. He averages six miles each day.

## Canada's Vegetable Growers

The province of Ontario in 1931 produced more than 40 per cent. of the total value of all vegetables grown in Canada while Quebec produced 21.5 per cent. Saskatchewan was in the third position with 9.9 per cent. British Columbia contributing 8.7 per cent.—Economic Analyst.

## Was Buffalo Hunter

One of the oldest pioneers of Manitoba and a first cousin of Louis Riel, with whom he served in the rebellion of 1870, Joseph Lagimodiere, 94, is still at his home in Winnipeg after a brief illness. In his youth he was well known as a skilled buffalo hunter.

## Tainted Milk

Milk cows should not be fed heavily on turnips or turnip tops, rape or rye, decayed cabbage, leeks, onions, or apples, otherwise a taint will appear in the butter.

Patrick Barry, who has died in Wiltshire, England, was drummer in the local band for 50 years.

Boycott movements in China are becoming more active.

## Cattle In The Air

Home At Sudbury, Ontario, To 80 Feet Above Street Level

Eighteen years ago the late Simon Paquette decided he needed plenty of fresh air—and for a while he built himself a home on the crest of a rock on Notre Dame St., Sudbury, Ontario. Since then his wife has climbed nearly 100 miles of steps. Mr. Paquette died two years after the house was built.

The home is 80 feet above the street level and there are 65 steps to the average of once a day, Mrs. Paquette has gone down town. It is calculated that she has navigated 854,100 steps. The upward climb totals 525,000 feet or 99,244 miles—too close to a hundred for comfort.

And though the house itself contains another flight of stairs, Mrs. Paquette does not complain.

"I suppose my husband wanted fresh air," she told the Sudbury Star. "I don't know any other reason he built it there. He may have liked the view. It is wonderful."

The view indeed is one of the best in the city. All of Notre Dame St. as far as the Sacred Heart College can be seen on one hand. On the other, the view extends to the main streets of Sudbury, past the post office, and behind the Canadian National Railway station.

Furthermore Mrs. Paquette raised two sons and one daughter, and never once did the children fall down any one of the 65 steps.

The only drawback, Mrs. Paquette added, is that passers-by stare at the home in its unusual location.

## A Mechanical Horse

A mechanical horse, designed to substitute for the farm animal, or even light tractor, has been invented in Italy. Propelled by a motor of only five horse-power, the mechanism cannot but only carry a person, but pulls a light farm vehicle over rough ground.

## Salt and Sweet Cream

When cows have free access to salt they will give better milk. It will give more milk, and the cream from this milk will have a better flavor than cream from cows that do not get any salt at all, or receive it only at long intervals.—Daily Branch, Ottawa.

## Educational Expenditures

Warning Of Evil Results From Unequal Economies

Warning that legislatures, public men and even taxpayers will reap the whirlwind if they now needs of wise economic in expenditures for educational purposes was sounded by E. J. Garland, M.P. for Bow River, when addressing delegates to the annual convention of the Alberta Educational Association.

The member's subject was "The Educational System Under the New Social Order," which he dealt with from various aspects during the course of an hour's address.

Declaring that it would be a revolutionary change, Mr. Garland said he would like to see the competitive system removed from the schools and group co-operation encouraged. Also more critical thinking on the part of the school children should be stimulated, with training of the youth to think of the good of the state and not individual aggrandizement.

## Real Show Of Gold

Only Ten Dollars Lost When Two Thousand Sifted

A literal shower of gold started residents of Livingston, Illinois recently.

Onlookers gazed when a catcher on a fast New York Central railway train broke under the weight of a mail pouch and \$2,000 in 10 gold pieces was scattered along the right-of-way at the station.

The station agent and his assistant immediately picked up the gold, finding all but one 10 gold piece. The gold was being sent to St. Louis by mail from the Livingston National Bank.

## Past Women In Business

Sixty years ago, when the typewriter first appeared, there was serious discussion as to whether operating the new machine was not too heavy work for delicate girls. Finally it was conceded that robust young women might risk such an occupation. There was little thought then that the typewriter signalled the wholesale entry of women into the business world.

## Gold Output In South Africa

Continues to break records.

## Great Bear Lake Mining Camp

Growth Of Village On The Rim Of Canada's Sub-Arctic

Growth of Cameron Bay, a village on the rim of Canada's sub-Arctic, was outlined at Toronto by James Bernard Day, who made the fastest airplane-train journey ever recorded from Great Bear Lake, newest mining camp in northwestern Canada.

Last year when he was there, Major Day said, there were two log buildings at Cameron Bay; now there are 20, including three stores and four more log buildings are in course of construction. A church and hospital are contemplated for the new village, where the population has grown to 120. Last year there were 30 residents.

One white woman lived there last year but now there are three with two white children, first in the district, in Cameron Bay village. They are the children—a boy of five and girl, three—of Mr. and Mrs. Victor Ingram. Mr. Ingram is a partner in Murphy's Service, a concern that operates the first store, bank, post office and restaurant.

Since establishment of the village and mining camps there has been an influx of Indians. Major Day said, that the Dogrib tribe who formerly traded at Fort Norman and Fort Rae. Now, he says, they are coming in increasing numbers to Great Bear Lake. Cameron Bay and for the first time in the history of the north, are prospecting.

Major Day said the food problem was solved in large measure when caribou crossed the Great Bear region in their migration for the first time in many years. Miners shot more than 450 of the animals and packed the meat in ice for the summer.

## Over Million "Removed"

Russia Has Way Of Dealing With So-Called Undesirables

Those Canadians who are keen for closer affiliations with Russia will be interested to learn on the authority of Walter Durney, of the New York Times, that a million souls have been lately removed to exile by the Moscow regime. The new terror appears to have taken in its transfer to other sections of the country, where they are employed, as the Stalin usurper chooses.

People of "undesirable social origin," such as former aristocrats, priests, officers, police and business men, on the one hand, and workers on the other, are taken from towns and cities and sent where the powers that be think they should go. It is said that the number thus removed runs at least a million. In a similar manner, thousands of families have been taken en masse from the cities where they have opposed the collectivization of farming and put in second-class camps.

The station agent and his assistant immediately picked up the gold, finding all but one 10 gold piece. The gold was being sent to St. Louis by mail from the Livingston National Bank.

## Goat Makes Good Judas

Leads Sheep To Slughter In Texas Packing Plant

Tom, a 225-pound goat, probably has saved millions to death than any other executioner in history.

Tom is chief of the sheep-leading squad at a packing plant in Fort Worth, Texas. When a new batch of mutton is needed, he is turned into the sheep pen.

He promotes his way through the flock to a narrow, twisting runway that leads to the execution room. The sheep follow him into the slaughter house. There Tom suddenly turns and descends the long chute—alone.

For three years Tom has been the Judas of hundreds of flocks.

## Doctor Of Divinity

Degree of doctor of divinity is to be conferred on Professor H. Frank Munro of St. Andrew's College, Saskatoon, at the spring convocation at Queen's University in May. It was announced. At the same time Lieutenant-Governor H. A. Bruce of Ontario will receive an honorary doctor of laws degree.

## No Default In England

The Victoria Colonial says cities in England have no debt limitations such as are imposed on this continent. Despite this there has not been a single default on municipal bonds in England. That is a high tribute to municipal management there.

The London Zoo earns as much as \$100 on a Saturday afternoon by giving rides on the animals to children.

## Gardening Notes

By Garden Lindsay Smith

The earlier trees, shrubs, rose bushes, climbers and such things are planted the better. This also applies to herbaceous perennials. Just as soon as one can dig the soil is the best time to get these things in as there is then plenty of moisture in the ground, and in this plentiful supply of moisture is the secret of successful transplanting. Spread roots out well and cover firmly with fine soil. A little commercial fertilizer dissolved in water will greatly help at this time.

With Annuals Alone—Wonderful results can be achieved with annuals alone which is a boon to the person who expects to move in the near future. Borders of mixed annual flowers, arranged in clumps of one color, with the taller sorts generally towards the rear are a good idea. And from the latter part of July are really more colorful than a bed of perennials. For solid beds, such things as Begonias, Impatiens, Petunias, Tulips, Dahlias, Calliopsis and Nasturtiums will be used. Hedges, upright shrubs or background plants created by the use of the taller growing annuals such as the Cosmos, Four O'Clock, Marigolds, Mexican Bush Vine, etc., are also good.

These Canadian who are keen for closer affiliations with Russia will be interested to learn on the authority of Walter Durney, of the New York Times, that a million souls have been lately removed to exile by the Moscow regime. The new terror appears to have taken in its transfer to other sections of the country, where they are employed, as the Stalin usurper chooses.

## Abundance Of Vegetables

The average Canadian does not realize the really wonderful variety in vegetables which this climate allows. As a matter of fact with a little planning, the utilization of early, medium and late varieties, and above all successful plantings, it is possible to have a supply of salad materials and more substantial vegetables coming on all summer and fall and of having these at the height of their freshness, too.

For instance, one should not confine himself simply to a short row of lettuce. There must be varieties that are young and tender. The crop can be strong out of the whole season if there are, say, three plantings each of three different types. There will be the leaf lettuce first, then the head, later on during the hot weather the romaine and finally to a crisp head and is practically self-blessing. One can supplement salad material with peas. It grows quickly on any soil and comes on early; green onions soon at ten-day intervals until the first of July so that they will be ready in succession; endive and mustard. By using three types of spinach the season for this crop is lengthened by several weeks. Include in the cabbage group both the red and white, and also cauliflower, brussels sprouts and broccoli. Using an early, medium and late pea, seeds of this one of the best of all things, will last for at least a month in the same way corn, beans, young beets and cress can be extended in season. Something out of the ordinary will be added by planting broad beans, egg plant, onion, leek, small globe squash and a host of other things passed over in previous years.

## London's Ancient Taxolons

Age-old trees are still playing the streets of London. In answer to questions, it was revealed in the House of Commons that out of 4,000 trees in the city, 1,000 are taxolons in season. Something out of the ordinary will be added by planting broad beans, egg plant, onion, leek, small globe squash and a host of other things passed over in previous years.

## Two Acquaintances Meet In A Department

"Hello, dear. You look busy."

"Yes, I'm trying to get something for my husband."

"Had any offers?"

## There are 30,000 Street Traders on Peddlers, in London. Of this number, 100 are sandwichmen.
